In this newsletter, we would like to clarify a post on the Broderbund forum about fixing PDF Converter installation under Windows 7, 64-bit. The post is titled "The Broderbund PDF Creator is not working on Windows 7" and states the following: "The Broderbund PDF creator requires that the user add a port to allow the program to function on Windows 7 64-bit. The installer does not make all of the necessary changes for the user. If the user does not make these changes, the application will become unresponsive and crash beginning the pdf creation process. The steps to repair this issue are: 1. Open Devices and Printers from the Control Panel. 2. Right click on Broderbund PDF Creator. 3. Click on Printer Properties. 4. View the Ports tab. 5. Click on the Add Port... button. 6. Highlight "Local Port" and click on the New Port... button (Not New Port Type...). 7. Enter any name for the port. 8. Restart Your Computer. 9. Return to the application. 10. Save your project as a PDF. " Item 7 should be: 7. Enter exactly "NUL:" for the port. If the NUL: port already exists, attach the PDF printer to this port Item 8 is optional and not typically needed. Part 1: Top 5 Problems and Solutions on Using Broderbund PDF Creator Problem 1: As a new customer, some people sometimes find it tasking downloading their order. Solution 1: After going through the process of ordering the software, an email containing the download link will be sent to the email provided. This link is to be clicked on or copied into your browser to begin the download of the software. "Save" should be clicked in the download box, and the saved file can be installed for immediate use. Problem 2: Users of previous versions of the software wanting to upgrade to the newer versions also face some challenges in doing this. Solution 2: The simple solution to this is uninstalling the version you already have before installing the new version. It is the same process as uninstalling any other computer program. Problem 3: Accessing online clip art and images can also be a problem when using Broderbund PDF Creator. Solution 3: This is usually as a result of the computer firewall blocking access to internet content. The way around the problem is by disabling the firewall hardware or software to enable the software download access content online. Problem 4: Another issue is not being able to connect to the Checkpoint license server. Solution 4: This is a result of the activation process not having Administrator privileges on Windows Vista and Windows 7 when trying to authenticate and save your key into the registry. The following process should be followed in order to bypass this error. Right click on the icon that starts the program, left click on properties, left click on compatibility tab, and check the box that says "Run this Program as administrator". You should be able to gain full access to the program after this process. Problem 5: Another problem that can be experienced when using Broderbund PDF Creator is the inability to convert to PDF files, with the "Unable to initialize the PDF Converter" coming up as response. Solution 5: This can be solved by deleting the Broderbund PDF Converter 2.10d and installing the Broderbund PDF Converter.
